## ABOUT ME

I am a passionate developer proficient in React and Next.js, delving into backend development and actively honing my Data Structures and Algorithms skills. My current role involves creating AI chatbot UIs utilizing Generative AI and GPT-3.5. I am also engaged in various AI projects and am currently learning Large Language Model training through Hugging Face. To explore my work and projects, please visit my digital portfolio [HERE](#).

## SKILLS

React JS.....Intermediate	Javascript.....Intermediate	CSS.....Intermediate
NEXT JS.....Intermediate	HTML.....Intermediate	Python.....Beginner
Node JS.....Beginner	Mongo DB.....Intermediate	AWS.....Beginner

## PROFESSIONAL EXPERIENCE

### Yellow.ai

Aug 2021 - Present

#### Presales Engineer

I developed a JavaScript-based React application tailored to the client's needs and seamlessly incorporated an AI chatbot. I extended its functionality by integrating it with various communication channels, employing APIs to connect with other bots, and enhancing its capabilities through Generative AI and GPT-3.5, demonstrating prompt engineering.

### Bizlem Pvt Ltd - Internship

Mar 2021 - Aug 2021

#### Business Analyst

Proficient in evaluating information from diverse sources, reconciling conflicts, breaking down complex information into details, and adeptly understanding and resolving customer queries.

### The Sparks Foundation - Internship

Nov 2020 - Jan 2021

#### Data Science & Business Analytics

I was assigned a task that involved analyzing a dataset using Python and basic Machine Learning techniques to predict a student's marks and interpret the resulting reports.

## PROJECTS

### Creative Portfolio Design

I developed a dynamic portfolio utilizing Next.js, showcasing UI designs for Flipkart, Netflix, and Instagram, encompassing 5 unique interfaces. Demonstrated creativity and proficiency in UI/UX design. [HERE](#)

### Search Algorithm using Gen AI

Developed a Python-based search algorithm using LangChain, enabling efficient document uploads and data querying, showcasing strong problem-solving and programming skills.

## LEARNING ACTIVITIES

### Finetuning Large Language Models

Coursera

### Prompt Engineering

Deeplearning.ai

### Node JS
